1993 Index
IEEE Transactions on Education
Vol. 36

This index covers all items — papers, correspondence, reviews, etc. — that appeared in this periodical during 1993, and items from previous years that were commented upon or corrected in 1993.

The Author Index contains the primary entry for each item, listed under the first author's name, and cross-references from all coauthors. The Subject Index contains several entries for each item under appropriate subject headings, and subject cross-references.

It is always necessary to refer to the primary entry in the Author Index for the exact title, coauthors, and comments/corrections.

AUTHOR INDEX

A

Alhamadi, Mohd A., *see* Demerdash, Nabeel A., *T-E May 93* 240-249
Arkadan, Abd A. A graduate course on finite element analysis for electromagnetic applications; *T-E May 93* 233-237
Arora, Vijay K., and Ganesh S. Samudra. Computer aided engineering in microelectronic processes and design in Singapore; *T-E Feb 93* 148-152
Atanasijevic-Kunc, Maja, *see* Zupancic, Borut, *T-E Aug 93* 340-347
Austin, H. S., *see* Garcia, O. N., *T-E Feb 93* 193-197

B

Báez-López, David, and Oscar Montero-Hernández. An interdisciplinary curriculum in electronics and computer engineering; *T-E Feb 93* 184-186
Baum, R. F., *see* Garcia, O. N., *T-E Feb 93* 193-197
Bocker, Richard P., and B. Roy Frieden. Solution of the Maxwell field equations in vacuum for arbitrary charge and current distributions using the methods of matrix algebra; *T-E Nov 93* 350-356
Boye, A. John, P. Frazer Williams, and Rodney J. Soukup. Using spreadsheets to teach problem solving in a first year class; *T-E Feb 93* 68-71
Brady, L. H., *see* Garcia, O. N., *T-E Feb 93* 193-197
Breuer, Melvin A., *see* Puvvada, Gandhi, *T-E Feb 93* 158-163
Broschat, Shira L., John B. Schneider, Frank D. Hastings, and Mark W. Steeds. Interactive software for undergraduate electromagnetics; *T-E Feb 93* 123-126

C

Cameron, R. S., Jr., *see* Garcia, O. N., *T-E Feb 93* 193-197
Carpenter, C. John. Teaching electromagnetism in terms of the potentials instead of the 'Maxwell' equations; *T-E May 93* 223-226
Carpinelli, John D., and Sol Rosenstark. Bridging the gap between digital circuits and microprocessors; *T-E Aug 93* 334-339
Castaneda, S. E., *see* Garcia, O. N., *T-E Feb 93* 193-197
Cendes, Zoltan J., *see* Hall, Vickie L., *T-E May 93* 279-283
Cha, Philip D., *see* Hoole, S. Ratnajeevan H., *T-E May 93* 265-269
Chen, J., *see* Garcia, O. N., *T-E Feb 93* 193-197
Chen, Tom. From system design to IC design in 14 weeks—Teamwork makes it possible; *T-E Feb 93* 137-140
Chiang, Hsiao-Dong, *see* Varghese, Matthew, *T-E Feb 93* 36-41
Coren, Richard L. Computational techniques in the first course on electromagnetism; *T-E May 93* 230-232
Coulomb, Jean-Louis, *see* Foggia, Albert, *T-E May 93* 272-279
Cui, Xiang, Jingguo Wang, and Hanguang Shao. The teaching of numerical techniques in computational electromagnetics; *T-E May 93* 261-265
Curi, Wilson Fadlo, and Kumaraswamy Ponnambalam. Introductory probabilistic and stochastic analysis and design of circuits; *T-E Feb 93* 51-56

D

Dattareya, G. R. A systematic approach to teaching binary arithmetic in a first course; *T-E Feb 93* 163-168
de Carvalho, J. L. Martins, *see* Machado, J. A. Tenreiro, *T-E Nov 93* 372-379
de Coulon, Frédéric, Eddy Forte, and Jose Maria Rivera. KIRCHHOFF: An educational software for learning the basic principles and methodology in electrical circuits modeling; *T-E Feb 93* 19-22
Demerdash, N. A. O., R. H. Gallagher, R. J. Schilling, and J. A. Svoboda. Impact of academic computing on teaching electrical engineering at Clarkson University; *T-E Feb 93* 94-102
Demerdash, Nabeel A., Zemin Luo, Mohd A. Alhamadi, and Brett T. Mattingly. Teaching electric machinery and associated electromagnetic fields—A case for the benefits of academic computing; *T-E May 93* 240-249
Desai, N. R., K. V. Hoang, and G. J. Sonek. Applications of PSPICE simulation software to the study of optoelectronic integrated circuits and devices; *T-E Nov 93* 357-362
Dey, P. P., *see* Garcia, O. N., *T-E Feb 93* 193-197
DiCristina, G. M., *see* Garcia, O. N., *T-E Feb 93* 193-197
Drozdowski, Mary Jo, *see* Stanton, Bill J., *T-E Feb 93* 62-68
Duncan, Terry S., *see* Stanton, Bill J., *T-E Feb 93* 62-68
Dym, Clive L. The role of symbolic representation in engineering design education; *T-E Feb 93* 187-193

E

Elmaghraby, A. S., *see* Garcia, O. N., *T-E Feb 93* 193-197
Elsherbeni, Atef Z., Darko Kajfez, and John A. Hawkes. Interactive display of vector fields inside waveguides; *T-E May 93* 283-286
Erlinger, Michael A. Networking—Centerpiece of academic computing; *T-E Feb 93* 90-94
Evans, Brian L., Lina J. Karam, Kevin A. West, and James H. McClellan. Learning signals and systems with Mathematica; *T-E Feb 93* 72-78
Excell, Peter S. Computational electromagnetics in education at the University of Bradford, England; *T-E May 93* 227-229
Eydgahi, Ali M., *see* Prendergast, Daniel P., *T-E Feb 93* 42-44

F

Ferris, Clifford D. Evaluation of bipolar junction transistor transconductance in practical applications; *T-E Aug 93* 293-295
Flesher, Jeffrey W. Enhancing electrical engineering computer laboratory quality through support evaluation; *T-E Feb 93* 103-104
Foggia, Albert, Jean-Louis Coulomb, Gilbert Reyne, Florence Ossart, and Afef Kedous-Lebouc. The French experience in integrating the program FLU372-379D in the undergraduate curriculum at the Institut National Polytechnique de Grenoble; *T-E May 93* 272-279
Forte, Eddy, *see* de Coulon, Frédéric, *T-E Feb 93* 19-22
Foster, R., *see* Garcia, O. N., *T-E Feb 93* 193-197
Freeman, C., *see* Garcia, O. N., *T-E Feb 93* 193-197
Freeman, Ernest M., *see* Lowther, David A., *T-E May 93* 219-222
Frieden, B. Roy, *see* Bocker, Richard P., *T-E Nov 93* 350-356
Fu, R. J., *see* Miri, S. M., *T-E Feb 93* 131-136

G

Galhano, Alexandra M. S. F., *see* Machado, J. A. Tenreiro, *T-E Nov 93* 372-379
Gallagher, R. H., *see* Demerdash, N. A. O., *T-E Feb 93* 94-102

SUBJECT INDEX

A

Antennas
computational EM in antenna and EMC courses at University of Bradford, England. *Excell, Peter S., T-E May 93* 227-229
Application-specific integrated circuits
low-cost hands-on training in microelectronic technologies. *Haskard, Malcolm R., T-E Aug 93* 295-301
Arithmetic; cf. Fixed-point arithmetic
Artificial intelligence
role of symbolic representation and artificial intelligence in engineering design education. *Dym, Clive L., T-E Feb 93* 187-193
teaching artificial intelligence, logic programming, and expert systems courses. *Garcia, O. N., + , T-E Feb 93* 193-197

B

Bibliographies
numerical approaches to teaching electromagnetics; historical sketch and lessons from structural engineering. *Hoole, S. Ratnajeevan H., + , T-E May 93* 265-269
teaching artificial intelligence, logic programming, and expert systems courses. *Garcia, O. N., + , T-E Feb 93* 193-197
Bifurcation; cf. Chaos
Binary arithmetic; cf. Fixed-point arithmetic
Bipolar transistors
evaluating BJT transconductance in practical applications. *Ferris, Clifford D., T-E Aug 93* 293-295
Biquadratic filters
PSPICE simulation of digital IIR filter biquad section. *Nielinger, Horst, T-E Nov 93* 383-385
Book reviews
Computer-Aided Analysis and Design of Electromagnetic Devices (Hoole, S. Ratnajeevan H.; 1989). *Pierluissi, J. H., T-E May 93* 289-290
DERIVE (Student Edition) (Amey, D. C.; 1992). *Nussbaum, Allen, T-E May 93* 289
Elements of Electromagnetics (Sadiku, M. N. O.; 1989). *Kao, Tai-wu, T-E May 93* 288
Linear Systems and Signals (Lathi, B. P.). *Wilson, Stephen G., T-E May 93* 287-288

C

CAD (computer-aided design); cf. Design automation; Design automation software
CAE; cf. Computer-aided engineering
Canada
tools for teaching courses in microelectronics in Canada; activities sponsored by Canadian Microelectronics Corp.. *Serra, M., + , T-E Feb 93* 141-147
Capacitors
circuit analysis problem involving two capacitors. *Mayer, Raymond P., + , T-E Aug 93* 307-309
Chaos
studying chaotic circuits using SPICE. *Hamill, David C., T-E Feb 93* 28-35
Circuit analysis
circuit analysis problem involving two capacitors. *Mayer, Raymond P., + , T-E Aug 93* 307-309
studying and teaching probabilistic and stochastic methods for circuit analysis. *Curi, Wilson Fadlo, + , T-E Feb 93* 51-56
teaching approach for using simulators in circuit analysis course. *Gray, Paul E., + , T-E Feb 93* 6-9
Circuit analysis; cf. Circuit simulation
Circuit boards; cf. Printed circuits
Circuit noise
noise margin criteria for digital logic circuits. *Hauser, John R., T-E Nov 93* 363-368
Circuits
digital circuits and microprocessor-design; undergraduate laboratory course. *Carpinelli, John D., + , T-E Aug 93* 334-339

Circuits; cf. Application-specific integrated circuits; CMOS integrated circuits; Logic circuits; Microwave circuits; Signal flow graphs; Very-large-scale integration
Circuit simulation
concerns in early introduction to computer-aided circuit simulation techniques; teaching approach aimed at instilling appreciation of circuit theory. *Pillage, Lawrence T., T-E Feb 93* 16-19
KIRCHHOFF, educational software for learning basic principles and methodology for lumped circuits. *de Coulon, Frédéric, + , T-E Feb 93* 19-22
PSPICE as aid in teaching principles of power electronics. *Hart, Daniel W., T-E Feb 93* 10-16
PSPICE computer modeling of hysteresis effects. *Prigozy, Stephen, T-E Feb 93* 2-5
PSPICE simulation of digital IIR filter biquad section. *Nielinger, Horst, T-E Nov 93* 383-385
PSPICE simulation software for studying optoelectronic ICCs and devices; Si and GaAs pin photodetector software models. *Desai, N. R., + , T-E Nov 93* 357-362
studying chaotic circuits using SPICE. *Hamill, David C., T-E Feb 93* 28-35
teaching approach for using simulators in circuit analysis course. *Gray, Paul E., + , T-E Feb 93* 6-9
Circuit stability; cf. Chaos
CMOS integrated circuits
tools for teaching courses in microelectronics in Canada; activities sponsored by Canadian Microelectronics Corp.. *Serra, M., + , T-E Feb 93* 141-147
Compilers
software engineering practice in undergraduate compiler course. *Liu, Hong, T-E Feb 93* 104-108
Computer-aided design; cf. Design automation; Design automation software
Computer-aided engineering
CAE in microelectronic processes and design in Singapore. *Arora, Vijay K., + , T-E Feb 93* 148-152
computation and computers in electrical engineering education (special issue). *T-E Feb 93* 1-213
Computer-aided engineering; cf. Circuit simulation
Computer communication; cf. Computer networks
Computer engineering education; cf. Computer science education
Computer graphics
interactive display of vector fields inside waveguides using WGVMAP software. *Elsherbeni, Atef Z., + , T-E May 93* 283-286
QSTRIPS, charge simulation program to enhance EM instruction. *Read, Alvin A., + , T-E May 93* 255-261
Computer graphics; cf. Scientific visualization; Workstations
Computer interfaces; cf. Workstations
Computer language processors; cf. Compilers
Computer languages; cf. Hardware design languages
Computer networks
impact of academic computing on teaching electrical engineering at Clarkson University. *Demerdash, N. A. O., + , T-E Feb 93* 94-102
Computer networks; cf. Distributed computing
Computer operating systems; cf. Software, operating systems
Computers; cf. Distributed computing; Information systems; Microprogramming; Multiprocessing
Computer science education
computer science and engineering curricula; three main ingredients for success. *Vemuri, V. Rao, T-E Feb 93* 108-110
information storage technology program at Santa Clara University; undergraduate, graduate and professional curricula. *Hoagland, Albert S., + , T-E Feb 93* 168-171
interdisciplinary curriculum in electronics and computer engineering. *Bóez-López, David, + , T-E Feb 93* 184-186
introducing undergraduates to parallel processing. *Hintz, Tom, T-E Feb 93* 210-213
quality assessment role in software engineering project. *Werth, Laurie Honour, T-E Feb 93* 181-183
software engineering practice in undergraduate compiler course. *Liu, Hong, T-E Feb 93* 104-108
systematic approach to teaching binary arithmetic in first course. *Dattareya, G. R., T-E Feb 93* 163-168
teaching computer hardware design using commercial CAD tools. *Puvvada, Gandhi, + , T-E Feb 93* 158-163
teaching firmware as bridge between hardware and software. *Mange, Daniel, T-E Feb 93* 152-157
teaching large-scale optimization using interior point approach. *Vannelli, Anthony, T-E Feb 93* 204-209
undergraduate computer science and engineering curriculum in India. *Rajaraman, Vaidyeswaran, T-E Feb 93* 172-177
Computer vision; cf. Machine vision
Continuing education
information storage technology program at Santa Clara University; undergraduate, graduate and professional curricula. *Hoagland, Albert S., + , T-E Feb 93* 168-171
Continuous-time systems
book review; Linear Systems and Signals (Lathi, B. P.). *Wilson, Stephen G., T-E May 93* 287-288
symbolic convolution of continuous-time and discrete-time signals using Mathematica software package. *West, Kevin A., + , T-E Nov 93* x8
Control engineering education
EDCON, educational control system analysis and design program. *Prendergast, Daniel P., + , T-E Feb 93* 42-44
educational aspects of CAD-supported real-time control. *Zupancic, Borut, + , T-E Aug 93* 340-347
methods for teaching industrial robot control design. *Vibet, Claude, T-E Feb 93* 45-51
Control systems; cf. Manipulators...; Real-time systems
Convolution
symbolic convolution of continuous-time and discrete-time signals using Mathematica software package. *West, Kevin A., + , T-E Nov 93* x8

D

Database systems; cf. Information systems
Data communication; cf. Computer networks
Decision-making
teaching firmware as bridge between hardware and software. *Mange, Daniel, T-E Feb 93* 152-157
Design automation
book review; Computer-Aided Analysis and Design of Electromagnetic Devices (Hoole, S. Ratnajeevan H.; 1989). *Pierluissi, J. H., T-E May 93* 289-290
Design automation; cf. Computer-aided engineering; Design automation software
Design automation software
EDCON, educational control system analysis and design program. *Prendergast, Daniel P., + , T-E Feb 93* 42-44
educational aspects of CAD-supported real-time control. *Zupancic, Borut, + , T-E Aug 93* 340-347
interactive software for undergraduate electromagnetics using Mathematica. *Broschat, Shira L., + , T-E Feb 93* 123-126
KIRCHHOFF, educational software for learning basic principles and methodology for lumped circuits. *de Coulon, Frédéric, + , T-E Feb 93* 19-22
Mathematica, computer algebra software system for helping students learn linear systems theory. *Evans, Brian L., + , T-E Feb 93* 72-78
PAT (protocol analysis tutor), computer-aided learning package for teaching data-link protocols. *Logan, John R., + , T-E Aug 93* 316-326
SHARPE, software tool for analyzing stochastic models. *Sahner, Robin A., + , T-E Feb 93* 56-61
symbolic convolution of continuous-time and discrete-time signals using Mathematica software package. *West, Kevin A., + , T-E Nov 93* x8
using CAD to teach fundamental network theory. *Vlach, Jiri, T-E Feb 93* 23-27
using EMCAD tools to solve real-world design problems in undergraduate EM curriculum. *Hall, Vickie L., + , T-E May 93* 279-283
using simulation software in EM curriculum. *Lowther, David A., + , T-E May 93* 219-222
Design automation software; cf. Circuit simulation; Hardware design languages
Design methodology
hands-on practical approach to teaching engineering design. *Miri, S. M., + , T-E Feb 93* 131-136
inducing creativity in undergraduate engineering students through challenging examinations and open-ended design problems. *Ghosh, Sumit, T-E Feb 93* 113-119
methods for teaching industrial robot control design. *Vibet, Claude, T-E Feb 93* 45-51
present state of and general approach to engineering education; teaching design through computation. *Vanderplaats, Garret N., T-E Feb 93* 110-112
role of symbolic representation and artificial intelligence in engineering design education. *Dym, Clive L., T-E Feb 93* 187-193
DFT; cf. Discrete Fourier transforms
Dielectric materials/devices; cf. Capacitors
Differential equations
using CAD to teach fundamental network theory. *Vlach, Jiri, T-E Feb 93* 23-27

Diffusion equations
computer program for animated analytical and partially discretized solutions to 1-D magnetic diffusion equation. *Levin, P. L., + , T-E Aug 93* 310-315
Digital filters; cf. IIR digital filters
Discrete Fourier transforms
simple and unified proof of dyadic shift invariance and extension to cyclic shift invariance. *Liu, K. J. Ray, T-E Nov 93* 369-371
Discrete-time systems
book review; Linear Systems and Signals (Lathi, B. P.). *Wilson, Stephen G., T-E May 93* 287-288
symbolic convolution of continuous-time and discrete-time signals using Mathematica software package. *West, Kevin A., + , T-E Nov 93* x8
Discrete transforms; cf. Discrete Fourier transforms
Displays; cf. Computer graphics
Distributed computing
network development and distributed computing for academic computing environment based on client/server model. *Erlinger, Michael A., T-E Feb 93* 90-94
Dyadic systems
simple and unified proof of dyadic shift invariance and extension to cyclic shift invariance. *Liu, K. J. Ray, T-E Nov 93* 369-371

E

Education; cf. Computer science education; Continuing education; Engineering education
Educational technology
computational techniques in first course on electromagnetism. *Coren, Richard L., T-E May 93* 230-232
computation and computers in electrical engineering education (special issue). *T-E Feb 93* 1-213
computer program for animated analytical and partially discretized solutions to 1-D magnetic diffusion equation. *Levin, P. L., + , T-E Aug 93* 310-315
computing transients on transmission lines in teaching EM using recursive algorithm and spreadsheet programs. *Hoole, S. Ratnajeevan H., T-E May 93* 250-255
educational aspects of CAD-supported real-time control. *Zupancic, Borut, + , T-E Aug 93* 340-347
impact of academic computing on teaching electrical engineering at Clarkson University. *Demerdash, N. A. O., + , T-E Feb 93* 94-102
interactive display of vector fields inside waveguides using WGVMAP software. *Elsherbeni, Atef Z., + , T-E May 93* 283-286
microcomputing in electrical engineering education at Drexel University. *Scoles, K., + , T-E Feb 93* 198-203
microprocessor design for nonelectrical engineers; integrated project-oriented approach. *Ume, Charles, + , T-E Aug 93* 327-333
network development and distributed computing for academic computing environment based on client/server model. *Erlinger, Michael A., T-E Feb 93* 90-94
PAT (protocol analysis tutor), computer-aided learning package for teaching data-link protocols. *Logan, John R., + , T-E Aug 93* 316-326
PSPICE as aid in teaching principles of power electronics. *Hart, Daniel W., T-E Feb 93* 10-16
QSTRIPS, charge simulation program to enhance EM instruction. *Read, Alvin A., + , T-E May 93* 255-261
spectrum analyzer laboratory project. *Spencer, Richard R., + , T-E Aug 93* 301-306
tools for teaching courses in microelectronics in Canada; activities sponsored by Canadian Microelectronics Corp.. *Serra, M., + , T-E Feb 93* 141-147
using educational software for teaching engineering electromagnetics. *Hoburg, J. F., T-E Feb 93* 119-122
using simulation software in EM curriculum. *Lowther, David A., + , T-E May 93* 219-222
using spreadsheet programs for sinusoidal steady-state transmission line impedance measurements and optics problems. *Shapiro, Finley R., T-E May 93* 269-272
using spreadsheet programs in student exercises for signal and linear system analysis. *Stanton, Bill J., + , T-E Feb 93* 62-68
using spreadsheet programs to teach problem-solving in first year electrical engineering class. *Boye, A. John, + , T-E Feb 93* 68-71
Educational technology; cf. Circuit simulation; Design automation software; Scientific visualization
Electrical engineering education
computation and computers in electrical engineering education (special issue). *T-E Feb 93* 1-213
computer operating systems in electrical engineering curriculum. *Yang, Chyan, T-E Feb 93* 177-180
concerns in early introduction to computer-aided circuit simulation techniques; teaching approach aimed at instilling appreciation of circuit theory. *Pillage, Lawrence T., T-E Feb 93* 16-19
enhancing electrical engineering computer laboratory quality through support services evaluation. *Flesher, Jeffrey W., T-E Feb 93* 103-104
impact of academic computing on teaching electrical engineering at Clarkson University. *Demerdash, N. A. O., + , T-E Feb 93* 94-102
KIRCHHOFF, educational software for learning basic principles and methodology for lumped circuits. *de Coulon, Frédéric, + , T-E Feb 93* 19-22
microcomputing in electrical engineering education at Drexel University. *Scoles, K., + , T-E Feb 93* 198-203
spectrum analyzer laboratory project. *Spencer, Richard R., + , T-E Aug 93* 301-306
studying and teaching probabilistic and stochastic methods for circuit analysis. *Curi, Wilson Fadlo, + , T-E Feb 93* 51-56
teaching approach for using simulators in circuit analysis course. *Gray, Paul E., + , T-E Feb 93* 6-9
teaching large-scale optimization using interior point approach. *Vannelli, Anthony, T-E Feb 93* 204-209
using CAD to teach fundamental network theory. *Vlach, Jiri, T-E Feb 93* 23-27
using spreadsheet programs in student exercises for signal and linear system analysis. *Stanton, Bill J., + , T-E Feb 93* 62-68
using spreadsheet programs to teach problem-solving in first year electrical engineering class. *Boye, A. John, + , T-E Feb 93* 68-71
Electrical engineering education; cf. Computer science education; Control engineering education; Electromagnetic engineering education; Electronics engineering education; Power engineering education
Electric machines; cf. Rotating machines
Electric variables measurement; cf. Transmission-line measurements
Electromagnetic analysis
book review; Computer-Aided Analysis and Design of Electromagnetic Devices (Hoole, S. Ratnajeevan H.; 1989). *Pierluissi, J. H., T-E May 93* 289-290
book review; Elements of Electromagnetics (Sadiku, M. N. O.; 1989). *Kao, Tai-wu, T-E May 93* 288
Electromagnetic analysis; cf. Electromagnetic engineering education; Hysteresis (magnetics); Numerical methods
Electromagnetic compatibility
computational EM in antenna and EMC courses at University of Bradford, England. *Excell, Peter S., T-E May 93* 227-229
Electromagnetic engineering education
book review; Elements of Electromagnetics (Sadiku, M. N. O.; 1989). *Kao, Tai-wu, T-E May 93* 288
Charge Master, IBM PC-compatible instructional tool for visualizing equipotentials and its use in introductory EM fields course. *Lyvers, Randy F., + , T-E May 93* 237-240
computational electromagnetics in the classroom (special issue). *T-E May 93* 217-286
computational EM in antenna and EMC courses at University of Bradford, England. *Excell, Peter S., T-E May 93* 227-229
computational techniques in first course on electromagnetism. *Coren, Richard L., T-E May 93* 230-232
computing transients on transmission lines in teaching EM using recursive algorithm and spreadsheet programs. *Hoole, S. Ratnajeevan H., T-E May 93* 250-255
graduate course on finite-element analysis for EM applications. *Arkadan, Abd A., T-E May 93* 233-237
interactive display of vector fields inside waveguides using WGVMAP software. *Elsherbeni, Atef Z., + , T-E May 93* 283-286
interactive software for undergraduate electromagnetics using Mathematica. *Broschat, Shira L., + , T-E Feb 93* 123-126
numerical approaches to teaching electromagnetics; historical sketch and lessons from structural engineering. *Hoole, S. Ratnajeevan H., + , T-E May 93* 265-269
QSTRIPS, charge simulation program to enhance EM instruction. *Read, Alvin A., + , T-E May 93* 255-261
teaching electric machinery and associated EM fields using academic computing. *Demerdash, Nabeel A., + , T-E May 93* 240-249
teaching electromagnetism in terms of potentials instead of Maxwell's equations. *Carpenter, C. John, T-E May 93* 223-226
teaching finite-element methods applied to electric machines using FLU372-379D package. *Foggia, Albert, + , T-E May 93* 272-279
teaching of numerical techniques in computational electromagnetics course; course content, objectives, and requirements. *Cui, Xiang, + , T-E May 93* 261-265
using educational software for teaching engineering electromagnetics. *Hoburg, J. F., T-E Feb 93* 119-122
using EMCAD tools to solve real-world design problems in undergraduate EM curriculum. *Hall, Vickie L., + , T-E May 93* 279-283

using simulation software in EM curriculum. *Lowther, David A., + , T-E May 93* 219-222
using spreadsheet programs for sinusoidal steady-state transmission line impedance measurements and optics problems. *Shapiro, Finley R., T-E May 93* 269-272
Electromagnetic interference; cf. Electromagnetic compatibility
Electromagnetic radiation
circuit analysis problem involving two capacitors. *Mayer, Raymond P., + , T-E Aug 93* 307-309
Electromagnetic radiation; cf. Antennas
Electronics engineering education
CAE in microelectronic processes and design in Singapore. *Arora, Vijay K., + , T-E Feb 93* 148-152
digital circuits and microprocessor design; undergraduate laboratory course. *Carpinelli, John D., + , T-E Aug 93* 334-339
interdisciplinary curriculum in electronics and computer engineering. *Bdez-López, David, + , T-E Feb 93* 184-186
low-cost hands-on training in microelectronic technologies. *Haskard, Malcolm R., T-E Aug 93* 295-301
PSPICE simulation of digital IIR filter biquad section. *Nielinger, Horst, T-E Nov 93* 383-385
PSPICE simulation software for studying optoelectronic ICCs and devices; Si and GaAs pin photodetector software models. *Desai, N. R., + , T-E Nov 93* 357-362
tools for teaching courses in microelectronics in Canada; activities sponsored by Canadian Microelectronics Corp.. *Serra, M., + , T-E Feb 93* 141-147
Electrooptic materials/devices; cf. Integrated optoelectronics
EMC; cf. Electromagnetic compatibility
Engineering; cf. Mechanical engineering; Structural engineering
Engineering education
course on computer modeling for second or third year engineering undergraduates. *Hoole, S. Ratnajeevan H., T-E Feb 93* 79-90
hands-on practical approach to teaching engineering design. *Miri, S. M., + , T-E Feb 93* 131-136
inducing creativity in undergraduate engineering students through challenging examinations and open-ended design problems. *Ghosh, Sumit, T-E Feb 93* 113-119
microprocessor design for nonelectrical engineers; integrated project-oriented approach. *Ume, Charles, + , T-E Aug 93* 327-333
network development and distributed computing for academic computing environment based on client/server model. *Erlinger, Michael A., T-E Feb 93* 90-94
present state of and general approach to engineering education; teaching design through computation. *Vanderplaats, Garret N., T-E Feb 93* 110-112
role of symbolic representation and artificial intelligence in engineering design education. *Dym, Clive L., T-E Feb 93* 187-193
teaching artificial intelligence, logic programming, and expert systems courses. *Garcia, O. N., + , T-E Feb 93* 193-197
Engineering education; cf. Computer science education; Continuing education; Electrical engineering education
Estimation; cf. Recursive estimation
Expert systems
teaching artificial intelligence, logic programming, and expert systems courses. *Garcia, O. N., + , T-E Feb 93* 193-197

F

Fast Fourier transforms; cf. Discrete Fourier transforms
FET integrated circuits; cf. CMOS integrated circuits
FFT (fast Fourier transform); cf. Discrete Fourier transforms
Filters; cf. IIR digital filters
Finite-element methods
computer program for animated analytical and partially discretized solutions to 1-D magnetic diffusion equation. *Levin, P. L., + , T-E Aug 93* 310-315
graduate course on finite-element analysis for EM applications. *Arkadan, Abd A., T-E May 93* 233-237
teaching finite-element methods applied to electric machines using FLU372-379D package. *Foggia, Albert, + , T-E May 93* 272-279
Firmware; cf. Microprogramming
Fixed-point arithmetic
systematic approach to teaching binary arithmetic in first course. *Dattareya, G. R., T-E Feb 93* 163-168
Flow graphs; cf. Signal flow graphs
Flow networks; cf. Networks
Fourier transforms; cf. Discrete Fourier transforms
Fractals
computer-aided engineering in power systems; from constructive methods to truncated fractals in nonchaotic power system models. *Varghese, Matthew, + , T-E Feb 93* 36-41

G

Graphics; cf. Computer graphics

H

Hadamard transforms; cf. Walsh analysis
Hardware; cf. Microprogramming
Hardware design languages
teaching computer hardware design using commercial CAD tools. *Purvoda, Gandhi, + , T-E Feb 93* 158-163
Hysteresis (magnetics)
PSPICE computer modeling of hysteresis effects. *Prigozy, Stephen, T-E Feb 93* 2-5

I

IIR digital filters
PSPICE simulation of digital IIR filter biquad section. *Nielinger, Horst, T-E Nov 93* 383-385
Image analysis; cf. Machine vision
Impedance measurement; cf. Transmission-line measurements
India
undergraduate computer science and engineering curriculum in India. *Rajaraman, Vaidyeswaran, T-E Feb 93* 172-177
Industrial control; cf. Manipulators
Industrial electronics
interdisciplinary curriculum in electronics and computer engineering; industrial electronics case study. *Bdez-López, David, + , T-E Feb 93* 184-186
Infinite-duration impulse-response digital filters; cf. IIR digital filters
Information systems
information storage technology program at Santa Clara University; undergraduate, graduate and professional curricula. *Hoagland, Albert S., + , T-E Feb 93* 168-171
Instructional aids; cf. Educational technology; Scientific visualization
Integrated circuit design; cf. Hardware design languages; Layout, integrated circuits
Integrated circuits; cf. Application-specific integrated circuits; CMOS integrated circuits; Integrated optoelectronics; Very-large-scale integration
Integrated optics; cf. Integrated optoelectronics
Integrated optoelectronics
PSPICE simulation software for studying optoelectronic ICCs and devices; Si and GaAs pin photodetector software models. *Desai, N. R., + , T-E Nov 93* 357-362
Interconnected systems; cf. Large-scale systems
Interference; cf. Power transmission electromagnetic interference

K

Knowledge-based systems; cf. Expert systems

L

Laboratories; cf. Electrical engineering education; Engineering education
Laplace transforms
using CAD to teach fundamental network theory. *Vlach, Jiri, T-E Feb 93* 23-27
Large-scale integration; cf. Very-large-scale integration
Large-scale systems
teaching large-scale optimization using interior point approach. *Vannelli, Anthony, T-E Feb 93* 204-209
Layout, integrated circuits
teaching VLSI design from system-level to layout-level using complex design project in one semester. *Chen, Tom, T-E Feb 93* 137-140

Linear algebra; cf. Matrices
Linear systems
book review; Linear Systems and Signals (Lathi, B. P.). *Wilson, Stephen G., T-E May 93* 287-288
Mathematica, computer algebra software system for helping students learn linear systems theory. *Evans, Brian L., + , T-E Feb 93* 72-78
using spreadsheet programs in student exercises for signal and linear system analysis. *Stanton, Bill J., + , T-E Feb 93* 62-68
Logic circuits
noise margin criteria for digital logic circuits. *Hauser, John R., T-E Nov 93* 363-368
Logic devices; cf. Programmable logic devices
Logic programming
teaching artificial intelligence, logic programming, and expert systems courses. *Garcia, O. N., + , T-E Feb 93* 193-197
Lyapunov methods
computer-aided engineering in power systems; from constructive methods to truncated fractals in nonchaotic power system models. *Varghese, Matthew, + , T-E Feb 93* 36-41

M

Machine vision
project-oriented approach to teaching advanced graduate level course in machine perception. *Myler, Harley R., T-E Nov 93* 380-382
Manipulators
methods for teaching industrial robot control design. *Vibet, Claude, T-E Feb 93* 45-51
Manipulators, dynamics
robot dynamics and compensation using classical and computed torque techniques. *Machado, J. A. Tenreiro, + , T-E Nov 93* 372-379
Matrices
solution of Maxwell field equations in vacuum for arbitrary charge and current distributions using matrix algebra methods. *Bocker, Richard P., + , T-E Nov 93* 350-356
Maxwell's equations
solution of Maxwell field equations in vacuum for arbitrary charge and current distributions using matrix algebra methods. *Bocker, Richard P., + , T-E Nov 93* 350-356
Mechanical engineering
microprocessor design for nonelectrical engineers; integrated project-oriented approach. *Ume, Charles, + , T-E Aug 93* 327-333
Microcomputer applications; cf. Educational technology
Microcomputers; cf. Workstations
Microelectronics; cf. Electronics engineering education
Microprocessor applications; cf. Educational technology
Microprocessors
digital circuits and microprocessor design; undergraduate laboratory course. *Carpinelli, John D., + , T-E Aug 93* 334-339
Microprogramming
teaching firmware as bridge between hardware and software. *Mange, Daniel, T-E Feb 93* 152-157
Microwave circuits
wave computation methods based on scattering parameters and signal flow graphs for microwave circuit theory. *Wedge, Scott W., + , T-E Feb 93* 127-131
Microwave measurements; cf. Scattering parameters measurement
Minimization methods; cf. Optimization methods
Modeling
course on computer modeling for second or third year engineering undergraduates. *Hoole, S. Ratnajeevan H., T-E Feb 93* 79-90
Modeling; cf. Circuit simulation; Photodetectors
MOS integrated circuits; cf. CMOS integrated circuits
Multiprocessing
introducing undergraduates to parallel processing. *Hintz, Tom, T-E Feb 93* 210-213

N

Nets; cf. Networks
Networks
using CAD to teach fundamental network theory. *Vlach, Jiri, T-E Feb 93* 23-27
Networks; cf. Computer networks
Noise; cf. Circuit noise
Nonlinear circuits; cf. Chaos
Nonlinear magnetics; cf. Hysteresis (magnetics)
Nonlinear systems; cf. Manipulators...
Numerical methods
numerical approaches to teaching electromagnetics; historical sketch and lessons from structural engineering. *Hoole, S. Ratnajeevan H., + , T-E May 93* 265-269
teaching of numerical techniques in computational electromagnetics course; course content, objectives, and requirements. *Cui, Xiang, + , T-E May 93* 261-265
Numerical methods; cf. Electromagnetic engineering education; Finite-element methods; Matrices; Maxwell's equations; Optimization methods

O

Obituaries
Gerald R. Peterson (1930–1990). *Mattson, Roy H., T-E Nov 93* 349
Operating systems; cf. Software, operating systems
Optical detectors; cf. Photodetectors
Optics
using spreadsheet programs for sinusoidal steady-state transmission line impedance measurements and optics problems. *Shapiro, Finley R., T-E May 93* 269-272
Optimization methods
teaching large-scale optimization using interior point approach. *Vannelli, Anthony, T-E Feb 93* 204-209
Optoelectronics; cf. Integrated optoelectronics

P

Parallel processing; cf. Multiprocessing
Partial differential equations; cf. Maxwell's equations
Peterson, Gerald R.
Obituary. *Mattson, Roy H., T-E Nov 93* 349
Photodetectors
PSPICE simulation software for studying optoelectronic ICCs and devices; Si and GaAs pin photodetector software models. *Desai, N. R., + , T-E Nov 93* 357-362
Power electronics
PSPICE as aid in teaching principles of power electronics. *Hart, Daniel W., T-E Feb 93* 10-16
Power engineering education
computer-aided engineering in power systems; from constructive methods to truncated fractals in nonchaotic power system models. *Varghese, Matthew, + , T-E Feb 93* 36-41
PSPICE as aid in teaching principles of power electronics. *Hart, Daniel W., T-E Feb 93* 10-16
Power system stability
computer-aided engineering in power systems; from constructive methods to truncated fractals in nonchaotic power system models. *Varghese, Matthew, + , T-E Feb 93* 36-41
Power system transients; cf. Power transmission electromagnetic interference
Power transmission electromagnetic interference
computing transients on transmission lines in teaching EM using recursive algorithm and spreadsheet programs. *Hoole, S. Ratnajeevan H., T-E May 93* 250-255
Printed circuits
low-cost hands-on training in microelectronic technologies. *Haskard, Malcolm R., T-E Aug 93* 295-301
Probability; cf. Stochastic processes
Problem-solving
using spreadsheet programs to teach problem-solving in first year electrical engineering class. *Boye, A. John, + , T-E Feb 93* 68-71
Programmable logic devices
low-cost hands-on training in microelectronic technologies. *Haskard, Malcolm R., T-E Aug 93* 295-301
Programming; cf. Logic programming
Protocols
PAT (protocol analysis tutor), computer-aided learning package for teaching data-link protocols. *Logan, John R., + , T-E Aug 93* 316-326

+ Check author entry for coauthors

† Check author entry for subsequent corrections/comments

Q

Quality assurance; cf. Software quality

R

Radiation detectors; cf. Photodetectors
Real-time systems
educational aspects of CAD-supported real-time control. *Zupancic, Borut, + , T-E Aug 93* 340-347
Recursive digital filters; cf. IIR digital filters
Recursive estimation
computing transients on transmission lines in teaching EM using recursive algorithm and spreadsheet programs. *Hoole, S. Ratnajeevan H., T-E May 93* 250-255
Reflection coefficient measurement; cf. Scattering parameters measurement
Reviews; cf. Book reviews
Robots; cf. Manipulators...
Rotating machines
teaching electric machinery and associated EM fields using academic computing. *Demerdash, Nabeel A., + , T-E May 93* 240-249
teaching finite-element methods applied to electric machines using FLU372-379D package. *Foggia, Albert, + , T-E May 93* 272-279

S

Scattering parameters measurement
wave computation methods based on scattering parameters and signal flow graphs for microwave circuit theory. *Wedge, Scott W., + , T-E Feb 93* 127-131
Scientific visualization
Charge Master, IBM PC-compatible instructional tool for visualizing equipotentials and its use in introductory EM fields course. *Lyvers, Randy F., + , T-E May 93* 237-240
teaching electric machinery and associated EM fields using academic computing. *Demerdash, Nabeel A., + , T-E May 93* 240-249
Semiconductor device modeling; cf. Photodetectors
Signal analysis
using spreadsheet programs in student exercises for signal and linear system analysis. *Stanton, Bill J., + , T-E Feb 93* 62-68
Signal analysis; cf. Spectral analysis
Signal flow graphs
wave computation methods based on scattering parameters and signal flow graphs for microwave circuit theory. *Wedge, Scott W., + , T-E Feb 93* 127-131
Signal processing; cf. Convolution; IIR digital filters
Simulation
QSTRIPS, charge simulation program to enhance EM instruction. *Read, Alvin A., + , T-E May 93* 255-261
Simulation; cf. Circuit simulation; Modeling
Singapore
CAE in microelectronic processes and design in Singapore. *Arora, Vijay K., + , T-E Feb 93* 148-152
Software
book review; DERIVE (Student Edition) (Arney, D. C.; 1992). *Nussbaum, Allen, T-E May 93* 289
computing transients on transmission lines in teaching EM using recursive algorithm and spreadsheet programs. *Hoole, S. Ratnajeevan H., T-E May 93* 250-255
interactive display of vector fields inside waveguides using WGVMAP software. *Elsherbeni, Atef Z., + , T-E May 93* 283-286
teaching finite-element methods applied to electric machines using FLU372-379D package. *Foggia, Albert, + , T-E May 93* 272-279
using educational software for teaching engineering electromagnetics. *Hoburg, J. F., T-E Feb 93* 119-122
using spreadsheet programs for sinusoidal steady-state transmission line impedance measurements and optics problems. *Shapiro, Finley R., T-E May 93* 269-272
using spreadsheet programs in student exercises for signal and linear system analysis. *Stanton, Bill J., + , T-E Feb 93* 62-68
using spreadsheet programs to teach problem-solving in first year electrical engineering class. *Boye, A. John, + , T-E Feb 93* 68-71
Software; cf. Design automation software; Educational technology; Microprogramming; Scientific visualization
Software design/development; cf. Logic programming
Software education; cf. Computer science education
Software, operating systems
computer operating systems in electrical engineering curriculum. *Yang, Chyan, T-E Feb 93* 177-180
Software quality
quality assessment role in software engineering project. *Werth, Laurie Honour, T-E Feb 93* 181-183
Special issues/sections
computational electromagnetics in the classroom. *T-E May 93* 217-286
computation and computers in electrical engineering education. *T-E Feb 93* 1-213
Spectral analysis
spectrum analyzer laboratory project. *Spencer, Richard R., + , T-E Aug 93* 301-306
Stability; cf. Lyapunov methods
Stochastic processes
SHARPE, software tool for analyzing stochastic models. *Sahner, Robin A., + , T-E Feb 93* 56-61
studying and teaching probabilistic and stochastic methods for circuit analysis. *Curi, Wilson Fadlo, + , T-E Feb 93* 51-56
Structural engineering
numerical approaches to teaching electromagnetics; historical sketch and lessons from structural engineering. *Hoole, S. Ratnajeevan H., + , T-E May 93* 265-269

T

Teaching; cf. Control engineering education; Electrical engineering education; Electromagnetic engineering education; Electronics engineering education; Engineering education
Torque control; cf. Manipulators, dynamics
Training; cf. Electronics engineering education
Transforms; cf. Discrete Fourier transforms; Laplace transforms; Walsh analysis
Transistors; cf. Bipolar transistors
Transmission coefficient measurement; cf. Scattering parameters measurement
Transmission-line measurements
using spreadsheet programs for sinusoidal steady-state transmission line impedance measurements and optics problems. *Shapiro, Finley R., T-E May 93* 269-272
Trees, graphs; cf. Decision-making

V

Very-large-scale integration
teaching VLSI design from system-level to layout-level using complex design project in one semester. *Chen, Tom, T-E Feb 93* 137-140
tools for teaching courses in microelectronics in Canada; activities sponsored by Canadian Microelectronics Corp.. *Serra, M., + , T-E Feb 93* 141-147
Vision systems (nonbiological); cf. Machine vision
Visualization; cf. Scientific visualization
VLSI; cf. Very-large-scale integration

W

Walsh analysis
simple and unified proof of dyadic shift invariance and extension to cyclic shift invariance. *Liu, K. J. Ray, T-E Nov 93* 369-371
Waveform analysis; cf. Spectral analysis
Waveguides
interactive display of vector fields inside waveguides using WGVMAP software. *Elsherbeni, Atef Z., + , T-E May 93* 283-286
Workstations
enhancing electrical engineering computer laboratory quality through support services evaluation. *Flesher, Jeffrey W., T-E Feb 93* 103-104
